GROUP WORKPLACE ENVIRONMENTAL POLICY

Deepwater is committed to pollution prevention and environmental protection at its facilities. We aim to achieve the highest standards of environmental performance in the interest of all our stakeholders, including employees, neighbors, the general public and the natural environment.

Deepwater is committed to complying with all federal, state, and local environmental legislation and regulations that may apply to our environmental aspects and impacts.

By preparing and implementing an Environmental Management System that includes policies, objectives and targets, we will administer a continuous program designed to ensure that products manufactured at Deepwater will not compromise or damage the environment. We will strive for continuous improvement in its implementation.

Deepwater will review the Environmental Management System annually and will also review our environmental aspects register and set Environmental Objectives and targets accordingly.

Adequate operational procedures and emergency plans will be implemented and reviewed on an ongoing basis. We will also ensure that our employees receive adequate training in relation to our environmental policies and procedures and will review these training needs as may be required.

We are committed to continuous improvement of our Environmental Management System and will ensure that it is integrated at all levels within our organization. We will strive for ever-improving environmental performance and are committed to protecting the environment for our employees, neighbors and all our other stakeholders.

This policy will be made available to the public.
